INTRO

I'm a proficient Golang backend engineer that scaled fintech products from 0 to 2.5M+ users including modern architectures, leading the growth of the engineering organization and participating in the day-to-day challenges of a hypergrowth startup.

EXPERIENCE

Brubank— *Lead Backend Engineer / Founding Engineer*

OCTOBER 2018 - CURRENT

Joined Brubank as a Founding engineer before product launch and grew a 0 to 2.5M+ users fintech product.

Shipped multiple core product features and led the first neo-bank credit card product service in Argentina for millions of users.

Led the engineering system organization with a modern microservices architecture with Redis, Elastic Search, and RabbitMQ, handling real-time notifications in the fintech environment.

Shepherded scaling the engineering organization from 4 to 18 engineers.

Stack: Go, GraphQL, PostgreSQL, Elasticsearch, Redis, RabbitMQ, Azure

Mercado Libre — *Backend Engineer*

JUNE 2017 - OCTOBER 2018

My first job was as a backend engineer working in the largest e-commerce platform in LatAm. Implemented new services in monitoring including the ELK stack, Docker, NxLog, and Golang.

Implemented an automatic phishing detector alongside Machine Learning teams to fight fraud that reduced trust and safety operational costs by 99%.

Stack: ELK, Golang, Docker, ML, ETL

EDUCATION

University of Buenos Aires — *Msc. Computer Science*

SKILLS

Golang

Python

Redis

Elastic Search

RabbitMQ

GraphQL

Azure
